READ THE INSTRUCTIONS ON BACK OF THIS CERTIFICATE

N. B.—In case of more than one child at a birth, a SEPARATE RETURN must be made for each and the number of each, in order of birth, stated.

INSTRUCTIONS

1. THIS IS A LEGAL DOCUMENT. IT IS A PERMANENT RECORD.
2. A birth certificate must be filed for every child born. In case of plural births a separate certificate must be filed for each child.

A stillbirth must be registered both as a birth and a death. If, however, the foetus has not advanced to the fifth month of uterogestation no certificate need be filed.

Midwives are prohibited by law from signing death certificates of stillborn children. In case of a stillbirth with no physician in attendance, refer the case to the coroner.
3. All information called for on this certificate must be given. Read the printed matter carefully.
4. THE PHYSICIAN in attendance must file the birth certificate with the local registrar of the registration district in which the birth occurs within four days after the birth. If there was no physician in attendance, then the midwife or person acting as such, must file the birth certificate with the local registrar. If no person attended the birth, then the father or mother must file the birth certificate with the local registrar.
5. In Freeholders Charter Cities and in those cities of 5,000 inhabitants or more at the last census which have a contract with the County Health Officer to care for the health work in that city, the health officer is the local registrar.

In other cities of 5,000 inhabitants or more at the last census, the city clerk is the registrar.

The balance of each county is divided into rural registration districts, with the registrar especially appointed. It is customary for city clerks to act as registrars for rural districts. Information concerning district boundaries can be obtained from the Department of Public Health, Vital Statistics, Sacramento.
6. SIGNATURE: This certificate must bear the ACTUAL SIGNATURE of the physician, midwife or person acting as midwife. Typewritten and rubber stamp signatures are not legal and can not be accepted.
7. If the child is not named before this certificate is filed a SUPPLEMENTAL REPORT OF BIRTH must be filed with the local registrar as soon as the child is named. Secure the blank from the local registrar.
8. Fill out the certificate (except signatures) with typewriter if possible. Otherwise WRITE PLAINLY with black ink.

BE CAREFUL in spelling names. Make them legible.

Frank Everett Beckner, being first duly sworn, upon oath says:

That through error, the date of his birth as written upon the information supplied to the Bureau of Vital Statistics of Idaho, from which to make registry of delayed certificate of birth, affiant's age was incorrectly stated. Affiant's birth-date is Nov. 16, 1902; the date appearing upon the photostatic copy sent affiant, as being the date of affiant's birth, is in fact the date of the father's birth, Oct 9, 1869.

This affidavit is made to enable the State of Idaho Bureau of Vital Statistics to make correction of the birth date of affiant.

Dated this the 2nd. day of August, 1941

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were incubated with the plant explants for 24 h. The explants were then cultured on the selective medium. The number of explants transformed was counted. The results are the mean \pm SD of three independent experiments. * indicates a significant difference ($p < 0.05$) between the control and the treated explants.

Figure 1. The effect of the concentration of the *Agrobacterium* strain on the transformation efficiency of *Agrobacterium* strain 1024. The concentration of the *Agrobacterium* strain 1024 was varied from 10⁶ to 10⁹ cells/ml. The transformation efficiency was determined as the number of transformants per 10⁶ cells of the *Agrobacterium* strain 1024. The data are the mean \pm SD of three independent experiments. The asterisk indicates a significant difference ($P < 0.05$) from the control.
